Hello.

I think people should live on another planet.

- ① Nowadays, typhoons and earthquakes on Earth are getting stronger and stronger. Some of those have destroyed houses and killed people. I think that it's not safe for us to stay on Earth anymore.
- ② If people can live on another planet, the human race won't become extinct. If Earth gets destroyed, humans living on another planet will continue to survive.

Thank you.

Hello.

I don't think people should live on another planet.

- ① We don't know if humans can survive on other planets. We don't know if we could adapt to a new planet's environment. People should stay on Earth because we already know how to live and survive here.
- ② Nowadays, a lot of us know about global warming and many people are planting trees and recycling. Earth will be a better place to live in if all of us work together on protecting the environment.

Thank you.
