Hello.

I think digital books are better than paper books.

- ① First, digital books are very convenient to store and carry. They are stored in smartphones, tablets, or e-readers, so you can carry hundreds of digital books on one device. These devices are light so you don't have to worry about their weight!
- ② Second, digital books are cheaper than paper books because there's no additional printing cost. Some digital books can be read or downloaded online for free, too!

All in all, I think digital books are great because they are convenient and cheap.

Thank you.

Hello.

I don't think digital books are better than paper books.

- ① First, reading paper books is better for our eyes. The light from smartphones or tablets is not good for our eyes, so reading digital books on these devices makes our eyes tired and can cause other eye problems.
- ② Second, I can focus on reading because there are no digital distractions when you read a paper book. If you read digital books on smartphones, messages or calls might appear so it's easy to lose focus on the book.

Thank you.
