(まず、電気自動車はガソリンを使いません。そのため、大気汚染を悪化させる有害なガスを出しません。)

MEMO

STEP 2 STEP 1 を使って自分の意見を書きましょう。**Example**

Hello.

I think everyone should drive an electric car.

- ① First of all, electric cars are good for the environment because they don't use gasoline. If we use less gasoline, fewer harmful gases will be released into the air.
- ② Next, electric cars run on electricity and electricity is cheaper than gas. Because of this, people can save money in the long term with an electric car.

In conclusion, I think people should drive electric cars because they are environmentally friendly and they help people save money on gas. Thank you.

Hello.

I don't think everyone should drive an electric car.

- ① Firstly, electric cars are expensive to buy. Although they don't need gasoline, they need electricity to run. Because of this, people's electricity bills will be higher.
- ② Secondly, electric cars take a long time to charge while gasoline-powered ones only take a few minutes to refuel. Charging electric cars for a long time is inconvenient.

Overall, I don't think it's practical for everyone to drive electric cars. Thank you.
